

JOIN US ON OCTOBER 11-12, 2022!

Focusing on “How the IMDS Data Structure is Changing to Accommodate Future Sustainability Requirements,” speakers at this year’s event will explore everything from RECO19 updates and sustainability issues, to impacts from the Chemicals Strategy for Sustainability – including the battery directive and digital product passport – and of course IMDS updates on what’s new in version 13.2, and what’s coming next in version 14.0.

Additional session highlights for our 2022 conference include:

- Updates on ELV, REACH, and IMDS data quality from the IMDS Steering Committee
- More in-depth information on TSCA, PIP (3:1) and PFAS.
- Updates on supplier activities from JAPIA & CLEPA
- And much more!

With the option to attend either in-person at the Suburban Collection Showplace in Novi, Michigan, or virtually via Zoom, it’s more convenient than ever to join us for this annual event. All attendees will gain a better understanding of the reporting requirements and regulations impacting their daily business, and those who are able to attend in person will also benefit from:

- Additional training in IMDS and Conflict Minerals Reporting Templates
- Connecting with sponsors and exhibitors
- Recordings on demand after the event
- Access to our always popular Networking Reception
