

SPEAKER BIOGRAPHY

Tammy Giroux
Environment and Energy Policy Manager
General Motors of Canada Limited

Tammy Giroux has been the Environment and Energy Policy Manager for General Motors of Canada Limited (GMCL) since January 2012. Tammy has public policy responsibility for chemical management, extended producer responsibility, and end of life vehicle issues as well as issues associated with GMCL's health and safety and policy management related to Worker Safety and Insurance Board (WSIB) issues.

Tammy began her career with GMCL as an intern in the Environmental Department in 1997. After graduation, Tammy joined the Oshawa Vehicle Assembly Plant and progressed through increasingly responsible positions including Environmental Officer, ISO 14001 Coordinator, and Business Plan Deployment Coordinator.

Tammy joined the Corporate Affairs department in September 2003 as a Senior Environmental Analyst responsible for coordinating all facility environmental reporting as well as supporting the Government Relations staff with policy analysis and lobbying for facility environmental initiatives including Cap and Trade, Corporate Social Responsibility, waste, water and air policies.

In 2009 Tammy joined the Ontario Ministry of Environment in the Air Policy and Climate Change Branch as a Senior Policy Analyst until her return to GMCL's Government Relations department in January 2012.

Tammy holds a Bachelor of Science Honours degree in Environmental Science from Queen's University.
