

SPEAKER BIOGRAPHY

Tina L. Noll

***Quality & Continuous Improvement
Meta Tool Technologies***

Tina Noll is a global quality systems leader with more than 25 years of experience across the automotive and industrial manufacturing industries. She has led quality management system development, compliance, and continuous improvement initiatives for organizations ranging from single-site operations to global manufacturing networks. Tina specializes in quality management systems, auditing, operational excellence, problem solving, leadership coaching and organizational development.

As a Global Quality System Manager, Tina supported quality and compliance initiatives across approximately 22 locations worldwide and has extensive experience working with customers, suppliers, and cross-functional teams in manufacturing environments from initial job award, prototype, serial life and end of life programs. She also serves on the AIAG Steering Committee, contributing to the advancement of industry's best practices and quality standards.

Tina is passionate about helping organizations build practical, sustainable systems that improve quality, customer satisfaction, employee engagement, and operational performance while developing cultures of continuous improvement and accountability.
