

SPEAKER BIOGRAPHY

Mike Payionk
Quality Control Program Manager
PennEngineering

Mike is the North American Quality Liaison with nearly 20 years of manufacturing experience, including more than 17 years in quality engineering and leadership roles. Throughout his career, he has focused on driving continuous improvement, strengthening quality systems, and partnering across teams to deliver better outcomes for customers. Mike is passionate about transforming quality from a compliance function into a strategic driver of customer experience. He looks forward to sharing practical insights on how organizations can reinvent quality to create lasting value for both customers and the business."
