

SPEAKER BIOGRAPHY

Andrew Amstutz
Vice President of Information Technology
Autokiniton

Andrew Amstutz is the Vice President of Information Technology for **AUTOKINITON**, where he leads enterprise technology strategy, cybersecurity, and business systems across the organization's global manufacturing operations.

With more than 30 years of experience in information technology, primarily supporting automotive and oil & gas manufacturers, Andrew has developed extensive expertise in enterprise applications and manufacturing technology.

A longtime member of the QAD ecosystem since 1996, he has served as both a customer and consultant, helping organizations maximize the value of their technology investments.

Andrew's contributions to the QAD community were recognized with the **QAD Ambassador Award** in 2020. He has also served as **President of the QAD Midwest User Group since 2023**, where he supports collaboration and best-practice sharing among manufacturing and technology leaders.

Andrew's current focus includes AI in manufacturing, cybersecurity, cloud transformation and operational technology.
