

SPEAKER BIOGRAPHY

Sudhakar Dakshinamoorthy
Senior Manager – System, Process and Tools
Magna Electronics

t photo

Sudhakar is a Quality and Program Management leader with over 20 years of experience across Engineering, Product Quality, and Continuous Improvement. He has a proven track record of driving process engineering initiatives and leading large-scale programs in industries such as automotive and retail. Known for his strong strategic vision and focus on engineering efficiency, he excels in planning, execution, and delivering customer-centric solutions.

He brings deep expertise in managing complex hardware and software products, including ADAS platforms, automotive safety systems, ECUs, perception systems, and consumer electronics. A trusted leader, he has successfully built and led customer-facing business units, fostering strong client relationships while delivering robust product quality strategies that enable sustainable growth, cost optimization, and competitive advantage.
