

SPEAKER BIOGRAPHY

Ryoma Akutsu

***Engineer, Product Environmental Management Sec.
Environmental Conservation dept.
Green Operations Group, Manufacturing Div.
Astemo, Ltd.***

Ryoma Akutsu is an engineer at Astemo Ltd. with over 12 years of experience in the Material Technology Development Department. During this time, he has specialized in research on polymer tribology, focusing on the friction, wear, and durability characteristics of plastic materials for automotive applications.

As of June 1, he transitioned to the Environmental Affairs Department, where he is engaged in product chemical substance management, including regulatory compliance and sustainability initiatives.

Since April 2023, he has been actively participating in the Japan Auto Parts Industries Association (JAPIA). Within JAPIA, he serves as a substance pilot for flame retardants, leading external coordination and collaborative activities related to regulatory and industry developments.
