

SPEAKER BIOGRAPHY

Fabio Bordina
ANFIA IATF OVERSIGHT MANAGER
ANFIA SERVICE

Fabio Bordina is an electronic engineer with over thirty years of experience in the development of complex systems in the automotive domain, combining strong technical expertise with a solid background in quality and process management. Throughout his career, he has been involved in product development, vehicle system integration, and industrialization, progressively taking on leadership roles and coordinating multidisciplinary teams.

Today, he focuses on quality management systems, acting as Oversight Manager for the IATF 16949 scheme and as ISO 9001 Responsible. His activities include oversight, training, and the design of courses on international standards such as Automotive SPICE, ISO 26262, information security, and AI management systems.

He has developed strong expertise across the entire product lifecycle, from requirements definition to validation and release, with a particular focus on quality, safety, and compliance.

His approach combines strategic vision with hands-on pragmatism, supporting organizations in improving processes, adopting standards, and achieving continuous performance improvement.”
