

Conference Speaker

John Yu

Chairman and CEO

Foresee Robotics Intelligence Technology Co.,Ltd.

www.foreseerobotics.com

John Yu is a 30-year veteran of the automotive industry and an ASQ-certified Quality Engineer (CQE). He previously held senior leadership roles in STA and Purchasing at Ford Motor Company, giving him deep, firsthand insight into both the quality and commercial dynamics of the global automotive supply chain.

In recent years, John has been at the forefront of AI-driven manufacturing innovation, with a proven track record of deploying advanced visual inspection systems and embodied robotics in live production environments — moving beyond proof-of-concept to measurable, shop-floor impact.

His work is delivering novel pathways to enhance parts quality consistency for automotive suppliers while accelerating their transition toward intelligent manufacturing.
